

STEREOTACTIC RADIATION THERAPY

Elekta Stereotactic Solutions

Every patient deserves
treatment this good

Elekta stereotactic systems offer the unrivaled accuracy you need to manage cancer and other serious disease more successfully than ever – without increasing the risk to healthy tissue. Treating cancer more effectively means fewer treatments, fewer hospital visits and less physical, mental and emotional strain for your patients.

Introducing . . . Elekta AXESSE™

- To ensure maximum accuracy in tumor targeting at the time of treatment, Elekta AXESSE™ includes unique 3D kV volume imaging capabilities, remote automatic positional correction in six dimensions and the highest quality patient immobilization
- Combined with conformal, high resolution beam shaping and the highest standards in photon beam delivery techniques including advanced PreciseBEAM® IMRT, Elekta AXESSE™ meets the high precision demands of stereotactic radiosurgery applications as well as extracranial stereotactic body radiation therapy applications and intracranial stereotactic radiation therapy (SRT)
- The accuracy of Elekta AXESSE™ inspires the clinical confidence to deliver single session and hypofractionated treatment regimes for spinal indications
- The delivery versatility of Elekta AXESSE™ and the availability of additional patient positioning devices means that treatment capabilities can be expanded and shaped to the needs of every department.

Elekta AXESSE™ is poised to be the preferred solution for SRT

Elekta AXESSE™ is work-in-progress and not for sale or distribution in all regions. Please contact your local Elekta representative or authorized distributor for further details.
